TPD54

Our heavy duty portable TPD54 Camper 54 Portable Satellite Dish, utilises a Danish Made Triax 54cm dish providing class leading signal reception for portable satellite use.

Its very easy to align using the individual elevation marks on the side of the patented slide elevation system.

This version has a heavy duty base which makes it our easiest portable dish to set-up and align.

This heavy duty base has levelling feet and will withstand higher wind.

It all disconnects and folds away for easy storage.

Simply easy.

Camper 54

All our portable dishes are simple to assemble, fold away and come with 10M of coax cable with quick connector.

Supplied with a 10750 Triax LNB , which is the most common setting in New Zealand which works well with Freeview and Sky channels.

Everything has been made for extended outside use and with easy to read instructions.
